01 / GET READY

Install. Activate. Create.

Your compact guide to GRIDVECTA 3.2.0 for Adobe Illustrator.

Seven tools. One connected workflow.

Grid Build / Logo Grid / Logo Folio / Print Suite
Visual Style / Brand Guide / Logo Pack

Before you install

Platform	Windows or macOS.
Illustrator	General ZXP package: versions 25.3-30.x. Adobe Marketplace package: Illustrator 30.x.
Connection	Internet access for initial trial or license activation.
Your download	Use the GRIDVECTA 3.2.0 ZXP supplied with your purchase, or install the version available on Adobe Marketplace.

Save your work first

Save open documents and fully close Illustrator before installing or updating. Keep a copy of the supplied installation package.

IN THIS GUIDE

02 Install on Windows or macOS
03 Activate and start working
04 Troubleshooting and useful links

02 / INSTALL

Choose your installation.

Use the instructions for the channel where you obtained GRIDVECTA.

A. Adobe Marketplace

Open the GRIDVECTA listing below, sign in with your Adobe account, and follow Adobe's installation prompts in Creative Cloud. The listing shows the version currently available.

Open GRIDVECTA on Adobe Marketplace

B. Purchased ZXP package

The same steps apply on Windows and macOS. Use a graphical ZXP installer for your operating system.

01

Get a ZXP installer

Download and install ZXPInstaller for Windows or macOS. This is a separate third-party installation tool.

02

Install your GRIDVECTA 3.2.0 ZXP

With Illustrator closed, open the installer and select or drag in the supplied .zxp file. Allow any installation permissions it requests and wait for confirmation.

03

Reopen Illustrator

Launch a supported Illustrator version and open or create a document.

Open the panel

Window > Extensions (Legacy) > GRIDVECTA

Updating an existing installation? Save your work, close Illustrator, install the new package and reopen the application. For Adobe installations, use the update provided through Adobe.

03 / ACTIVATE & START

Ready when you are.

Open GRIDVECTA and use the activation screen to begin.

Start the 7-day trial

Connect to the internet, select the trial option and follow the on-screen prompts. Wait for the panel to confirm that the trial is active.

When the trial ends

Plugin actions are locked across all seven sections, including logo capture, creation, customization and export. Activate a purchased license to continue.

Activate a purchased license

Connect to the internet and enter the license key supplied with your purchase. Choose the activation option and wait for confirmation. Use the same key on up to **2 devices**.

Lifetime access: one-time purchase, no subscription. After successful activation, the purchased license works offline without scheduled monthly online checks. Keep your license key private.

Your first project

Prepare: open a document and select vector artwork for Logo Grid or Smart Capture.

Create: supply your logo assets, choose a presentation template where required, then generate.

Refine: use Customize in supported presentation tools. Use Logo Pack to export organized web and print files with a local web collection.

04 / HELP & LINKS

A little help, if needed.

Start with the matching issue, then contact us if it persists.

Panel missing from the menu

Confirm that the package supports your Illustrator version. Fully quit and reopen Illustrator, then check Window > Extensions (Legacy).

ZXP installation fails

Close Illustrator, confirm that the download is complete, and retry with the correct installer for your operating system.

Activation does not complete

Check your internet connection and re-enter the supplied key exactly. If a device-limit message appears, contact support.

Generate or capture is unavailable

Open a document, select suitable artwork where required, and check that your trial or purchased license is active.
